

Austin Stephens

Assignment 9

4/25/17

1. I've successfully written a function that calculates the length of the vector. I've also successfully overwritten the '+' and '==' operators to add vectors and compare vectors respectively.

```
C:\Users\iamam\Desktop\School\CECS 130\HW\HW 9\problem_01.exe
Create two vectors and print them
(1,2,3) Length: 3.74166
(1,2,3) Length: 3.74166

Compare vector one and vector two.
True

Add the two vectors
(2,4,6) Length: 7.48331

Compare vector one and the sum.
False
